

Definition of Striking of Load.

For the purpose of this insurance, **striking of load** shall be defined as collision of the cargo with one or more objects other than the carrying/hauling truck, where such collision of the cargo is not a result of an accident to the carrying/hauling truck. In the event of an accident or collision involving the carrying/hauling truck, with resultant damage to the cargo carried, then the higher “striking of load” deductible shall not be applied.
